Tuwairqi Steel signs power pact with KESC

By Our Staff Reporter

KARACHI, March 6: Tuwairqi Steel Mills Limited (TSML), the country-arm of Saudi Arabia's largest private-sector steel producer, Al Tuwairqi Holding in Pakistan, has signed a contract with the Karachi Electric Supply Corporation (KESC), for adding 14MW of electricity to the power utility's network.

The signing ceremony was held at KESC head office on Saturday.

The alliance comes at a crucial juncture when the utility company is looking at adding power generation capacities to its network to help meet current shortfall in Karachi.

The TSML would start providing 14MW to KESC from May, 2010.

The contract was signed by Zaigham Adil Rizvi, director (projects), TSML and Tabish Gauhar, CEO, KESC, says a press release.

"We are also exploring alternate modes of electricity generation like wind and so-

lar resources," said Zaigham Adil.

The company has installed four gas turbines of Kawasaki Japan having a capacity of 6.5MW each, installation of a gas engine of 2.4 MW is currently under way, and a steam turbine of 12MW will be installed in future, which will operate on heat recovery steam boiler on exhaust energy of these gas turbines, he added.

Currently, electrical and piping works are under way and hopefully commercial operations would commence after the the completion of commissioning phase by the end of May, 2010.

Tabish Gauhar said the KESC's management is committed to add more generation capacity to the utility's network. Since September 2008, the company has added 450 MW of internal generation capacity to the system and more projects are under implementation on fast track basis.

KARACHI: Tuwairqi Steel Mills Limited (TSML), the country-arm of Saudi Arabia's largest private sector steel producer Al Tuwairqi Holding in Pakistan, has signed a contract with Karachi Electric Supply Corporation (KESC), for adding 14Mw of electricity to the power utility's network.

The signing ceremony was held at KESC Head Office on Saturday. This alliance comes at a crucial juncture when the utility company is looking to add power generation capacities to its network, in order to help meet the current shortfall of electricity in Karachi. As per the contract, TSML will start providing 14MW of electricity to KESC from May 2010.

The contract was signed by Zaigham Adil Rizvi, Director (Projects) of TSML and Tabish Gauhar, CEO, KESC. Zubair Motiwala, advisor to Chief Minister Sind for investment and other senior officials from KESC and TSML were also present at the occasion. Commenting on the collaboration Rizvi said: "This initiative of contributing electricity to KESC's network is in line with the vision of Al Tuwairqi's management in Saudi Arabia to help meet the growing demand of energy in Pakistan.

We are also exploring alternate modes of electricity generation like wind and solar resources.

"We have installed four gas turbines of Kawasaki Japan having a capacity of 6.5MW each, installation of a gas engine of 2.4 MW is currently underway, and a steam turbine of 12Mw will be installed in future, which will operate on Heat Recovery Steam Boiler on exhaust energy of these gas turbines. Currently, electrical and piping works are underway and hopefully commercial operations will commence after the completion of commission phase by the end of May 2010, he added.

He also acknowledged the role of National Bank of Pakistan, for extending an instrumental support to the project.

Tabish Gauhar said: "KESC's management is committed to add more generation capacity to the utility's network. Since September 2008, we have added 450Mw of internal generation capacity to the system and more projects are under implementation on fast track basis. In future this will enable us to deal with electricity supply position more effectively.

Today's signing of contract with Tuwairqi Steel Mills for adding more electricity to KESC's system is another step in this direction."
